

## Preface

This document contains all five reports for Bilkent Senior Design Project LodeStar. These reports are as follows:

- Project Specification Report
- Analysis Report
- High Level Design Report
- Low Level Design Report
- Final Report

During the development of this project, we have had the opportunity to learn about the newest tools and technologies. We have been fortunate enough to work with Virtual Reality, which is one of today's hottest developments. Moreover, we have learnt how to work as a team (even under the most stressful deadline days) and built a friendship that we will never forget about. Thank you for giving us the chance to experience this project. We have definitely learnt a lot.

Special thanks to Bülent Özgüç, our project advisor for answering our burning questions even at 05.39AM in the morning. Thanks for keeping us motivated. With each one of our weekly meetings, you have shared many of your past experiences and pointed us towards the right direction. Without your help, we would not have been able to write these reports, draw these mockups and develop project LodeStar.

Also special thanks to our jury members, Uğur Gündükbay and Çiğdem Demir for providing helpful feedback during the development lifecycle.

Sincerely,

Team LodeStar
